

ABSTRACT OF THE DISCLOSURE

A toy gun includes a gun body, a support seat, a magazine, a gas control device, and a slide. The gas control device is mounted in the support seat and includes a link, a press plate, a baffle, a first clamping block, a driven
5 block, a second clamping block, a limit plate, a hammer, a first shaft, and a second shaft. Thus, the gas control device can control operation of the gas valve of the gas chamber of the magazine exactly, so that the toy gun is operated smoothly and stably.
